AB - A hydro-mechanical transmission for an agricultural work vehicle
is provided including a motor, a clutch and a differential
assembly. The clutch which is rotatably supported by a housing
includes first and second input shafts and a first output shaft.
The first output shaft is configured to selectively couple to the
first and second input shafts. The motor is coupled to the second
input shaft, and the differential assembly which is rotatably
supported by the housing is coupled to the first output shaft. The
differential assembly includes a third input shaft coupled to the
first output shaft, and a fourth input shaft coupled to the
motor, and a second output shaft. The speed of the second output
shaft is a combination of the speeds of the third and fourth input
shafts.
